Sekundäre Formen des Foreigner Talk im Deutschen aus übersetzungswissenschaftlicher Sicht Tamás Fáy, 2012-04-18

Dieses Buch stellt den sekundären Foreigner Talk mit seinen vielfältigen Verwendungsweisen aus übersetzungswissenschaftlicher Perspektive dar. Im Mittelpunkt stehen dabei Fragen zu seiner Übersetzbarkeit und zur Struktur der Foreigner-Talk-Kompetenz von Übersetzern. In einem weiteren Zusammenhang soll das Verhältnis zwischen primärem und sekundärem Foreigner Talk diskutiert sowie umstrittene Aspekte des Foreigner Talk kritisch reflektiert werden.

Enforcement of Foreign Arbitral Awards and Judgments in New York Andreas A. Frischknecht, Yasmine Lahlou, Gretta L. Walters, 2016-04-24 Merely obtaining a favorable arbitral award or judgment at the end of a dispute holds little value unless the prevailing party is able to enforce it. This book, more thoroughly than any other source, shows practitioners how to navigate the relevant laws in New York—a leading global financial center known for its pro-enforcement policies and the powerful discovery tools it makes available to creditors. No other resource explores the current state of the law in New York as comprehensively as this book. Beyond its sheer practical significance given the likelihood of debtors having assets in (or routing U.S. dollar transactions through) New York, this book provides creditors and their counsel with the critical information they need to define their global enforcement strategy and facilitate their enforcement efforts not only in New York but potentially worldwide. Among the issues and topics that the book tackles are the following: • review of the fundamentals of U.S. practice and procedure for non-New York practitioners; • easy to understand, jargon-free explanation of the often daunting state and federal procedures for enforcement; • up-to-date, clear presentation of the relevant case law, including key state and federal decisions; • explanation of how state and federal laws intersect with international law; • review of significant recent developments impacting a creditor's ability to reach foreign defendants and their assets outside the U.S. in post-judgment execution proceedings; and • comprehensive advice on the practicalities of executing a judgment. Given the critical role New York plays in a host of cross-border transactions and its status as a hub for worldwide judgment and award enforcement, the demand to better understand the laws and judicial system within the state has never been higher. This comprehensive yet practical guide to navigating award and judgment enforcement in New York provides the

understanding both the basics and the nuances in this area that is critical for any domestic or international practitioner when advising a client as to the likelihood of collection in or through New York.

Conflicted Democracies and Gendered Violence Angana P. Chatterji, Shashi Buluswar, Mallika Kaur, 2016-11-04 The Sexual Violence and Impunity in South Asia research project (coordinated by Zubaan and supported by the International Development Research Centre) brings together, for the first time in the region, a vast body of research on this important - yet silenced - subject. Six country volumes (one each on Bangladesh, Nepal, Pakistan, Sri Lanka, and two on India, as well as two standalone volumes) comprising over fifty research papers and two book-length studies, detail the histories of sexual violence and look at the systemic, institutional, societal, individual and community structures that work together to perpetuate impunity for perpetrators. The essays in this volume focus on Nepal, which though not directly colonized, has not remained immune from the influence of colonialism in its neighbourhood. In addition to home-grown feudal patriarchal structures, the writers in this volume clearly demonstrate that it is the larger colonial and post-colonial context of the subcontinent that has enabled the structuring of inequalities and power relations in ways that today allow for widespread sexual violence and impunity in the country - through legal systems, medical regimes and social institutions. The period after the 1990 democratic movement, the subsequent political transformation in the aftermath of the Maoist insurgency and the writing of the new constitution, has seen an increase in public discussion about sexual violence. The State has brought in a slew of legislation and action plans to address this problem. And yet, impunity for perpetrators remains intact and justice elusive. What are the structures that enable such impunity? What can be done to radically transform these? How must States understand the search for justice for victims and survivors of sexual violence? The essays in this volume attempt to trace a history of sexual violence in Nepal, look at the responses of women's groups and society at large, and suggest how this serious and wide-ranging problem may be addressed.

Going to Tehran Flynt Leverett, Hillary Mann Leverett, 2013-01-08 An eye-opening argument for a new approach to Iran, from two of America's most informed and influential Middle East experts Less than a decade after Washington endorsed a fraudulent case for invading Iraq, similarly misinformed and politically motivated claims are pushing America toward war with Iran. Today the stakes are even higher: such a war could break the back of America's strained superpower status. Challenging the daily clamor of U.S. saber rattling, Flynt and Hillary Mann Leverett argue that America should renounce thirty years of failed strategy and engage with Iran—just as Nixon revolutionized U.S. foreign policy by going to Beijing and realigning relations with China. Former analysts in both the Bush and Clinton administrations, the Leveretts offer a uniquely informed account of Iran as it actually is today, not as many have caricatured it or wished it to be. They show that Iran's political order is not on the verge of collapse, that most Iranians still support the Islamic Republic, and that Iran's regional influence makes it critical to progress in the Middle East. Drawing on years of research and access to high-level officials,

Going to Tehran explains how Iran sees the world and why its approach to foreign policy is hardly the irrational behavior of a rogue nation. A bold call for new thinking, the Leveretts' indispensable work makes it clear that America must go to Tehran if it is to avert strategic catastrophe.

The Cambridge Companion to Literature and the Posthuman Bruce Clarke,Manuela Rossini,2017 This book gathers diverse critical treatments from fifteen scholars of the posthuman and posthumanism together in a single volume.

Harmonious Intervention Chiung-Chiu Huang,Chih-yu Shih,2016-04-22 Two major features of international relations at the beginning of the 21st century are global governance and the rise of China. Global governance, advocating global norms, requires intervention into sovereign domains in defiance of those norms. However, an ascendant China adheres to a classic stance on sovereign integrity which prohibits such intervention. Whether or not China will ultimately Sinicize global governance or become assimilated into global norms remains both a theoretical and a practical challenge. Both challenges come from China's alternative style of global governance, which embodies the doctrine of 'balance of relationship,' in contrast with the familiar international relations embedded in 'balance of power' or 'balance of interest.' An understanding of China's intervention policy based upon the logic of balance of relationship is therefore the key to tackling the anxiety precipitated by these theoretical as well as practical challenges.

Perceptions and Policy in Transatlantic Relations Natividad Fernández Sola,Michael Smith,2009 Experts draw on Robert Jervis' work to examine recent tensions between Europe and the US over such issues as transatlantic security and policies towards terrorism, against the background of perceptions and misperceptions in transatlantic relations.

Social Movements and Political Activism in Contemporary Japan David Chiavacci,Julia Obinger,2018-02-21 This book explores social movements and political activism in contemporary Japan, arguing that the 2011 Fukushima nuclear accident marks a decisive moment, which has led to an unprecedented resurgence in social and protest movements and inaugurated a new era of civic engagement. Offering fresh perspectives on both older and more current forms of activism in Japan, together with studies of specific movements that developed after Fukushima, this volume tackles questions of emerging and persistent structural challenges that activists face in contemporary Japan. With attention to the question of where the new sense of contention in Japan has emerged from and how the newly developing movements have been shaped by the neo-conservative policies of the Japanese government, the authors ask how the Japanese experience adds to our understanding of how social movements work, and whether it might challenge prevailing theoretical frameworks.

The Coming of Neo-Feudalism Joel Kotkin,2020-05-12 Following a remarkable epoch of greater dispersion of wealth and opportunity, we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property, reduced upward mobility, demographic stagnation, and increased dogmatism. If the last seventy years saw a massive expansion of the middle class, not only in America but in much of the developed world, today that class is declining

and a new, more hierarchical society is emerging. The new class structure resembles that of Medieval times. At the apex of the new order are two classes—a reborn clerical elite, the clerisy, which dominates the upper part of the professional ranks, universities, media and culture, and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information. These two classes correspond to the old French First and Second Estates. Below these two classes lies what was once called the Third Estate. This includes the yeomanry, which is made up largely of small businesspeople, minor property owners, skilled workers and private-sector oriented professionals. Ascendant for much of modern history, this class is in decline while those below them, the new Serfs, grow in numbers—a vast, expanding property-less population. The trends are mounting, but we can still reverse them—if people understand what is actually occurring and have the capability to oppose them.

Media and Translation Dror Abend-David, 2014-07-31 Over the last decade there has been a dramatic increase in publications on media and translation. In fact, there are those who believe that so much has been published in this field that any further publications are superfluous. But if one views media and translation as anything ranging from film and television drama to news-casting, commercials, video games, web-pages and electronic street signs, it would seem that research in media and translation has barely scratched the surface. The research in this field is shared largely by scholars in communication and translation studies, often without knowledge of each other or access to their respective methods of scholarship. This collection will rectify this lack of communication by bringing such scholars together and creating a context for a theoretical discussion of the entire emerging field of Media and Translation, with a preference for theoretical work (rather than case studies) on translation and communications of various forms, and through various media.

Developing Culturally and Historically Sensitive Teacher Education Yolanda Gayol Ramírez, Patricia Rosas Chávez, Peter Smagorinsky, 2020-09-17 Shortlisted for the UK Literacy Association's Academic Book Award 2021 This volume explores the literacy education master's degree program developed at Universidad de Guadalajara in Jalisco, Mexico, with the aim of addressing the nation's emerging social, economic, technological, and political needs. Developing the program required taking into account the cultural diversity, historical economic disparities, indigenous and colonial cultures, and power inequities of the Mexican nation. These conditions have produced economic structures that maintain the status quo that concentrates wealth and opportunity in the hands of the very few, creating challenges for the education and economic life for the majority of the population. The program advocates providing tools for youth to critique and change their surroundings, while also learning the codes of power that provide them a repertoire of navigational means for producing satisfying lives. Rather than arguing that the program can be replicated or taken to scale in different contexts, the editors focus on how their process of looking inward to consider Mexican cultures enabled them to develop an appropriate educational program to address Mexico's historically low literacy rates. They show that if all teaching and learning is context-dependent, then

focusing on the process of program development, rather than on the outcomes that may or may not be easily applied to other settings, is appropriate for global educators seeking to provide literacy teacher education grounded in national concerns and challenges. The volume provides a process model for developing an organic program designed to address needs in a national context, especially one grounded in both colonial and heritage cultures and one in which literacy is understood as a tool for social critique, redress, advancement, and equity.

Merging Interests Sarah Bauerle Danzman, 2019-12-19 Why do governments open their economies to multinational enterprises (MNEs)? Some argue democratic forces promote this openness, but many citizen groups view multinational business with suspicion. Using quantitative and qualitative analysis, Bauerle Danzman demonstrates how large domestic firms push to liberalize foreign direct investment (FDI) policies to ameliorate financing constraints, often to the detriment of smaller competitors. MNE entry comes with substantial risks, such as higher labour costs and increased productivity pressures, so well-connected domestic firms will prefer to limit access to local markets when the costs of debt financing are relatively low. However, when local environments make debt financing increasingly expensive, firms will be more willing to dismantle restrictive investment policies so that they may overcome liquidity constraints with equity financing from abroad. Bauerle Danzman includes comparative analysis of Malaysia and Indonesia from 1965–2016 to illustrate how governments undertake investment policy reform, and to indicate the interest groups that influence the outcomes of these regulatory changes.

The Romanian Cinema of Nationalism Onoriu Colăcel, 2018-10-10 Prior to the collapse of communism, Romanian historical movies were political, encouraging nationalistic feelings and devotion to the state. Vlad the Impaler and other such iconic figures emerged as heroes rather than loathsome bloodsuckers, celebrating a shared sense of belonging. The past decade has, however, presented Romanian films in which ordinary people are the stars—heroes, go-getters, swindlers and sore losers. The author explores a wide selection, old and new, of films set in the Romanian past.

You Shall Love the Stranger as Yourself Fleur S Houston, 2015-03-24 You Shall Love the Stranger as Yourself addresses the complex political, legal, and humanitarian challenges raised by asylum-seekers and refugees from a Biblical perspective. The book explores the themes of humanity and justice through exegesis of relevant passages in the Old and New Testaments, skillfully woven into accounts of contemporary refugee situations. Applying Biblical analysis to one of the most pressing humanitarian concerns of modern times, Houston creates a timely work that will be of interest to students and scholars of theology, religion, and human rights.

Immigration, Security, and the Liberal State Gallya Lahav, Anthony M. Messina, 2023-12-31 Contextualizing the regulation of human mobility in a new security framework, this book offers an original perspective on the dominant mode of politics and evolving norms shaping the immigration policies of contemporary liberal states. In doing so, the authors

challenge existing paradigms that privilege economic and cultural factors over new security ones in explaining the critical institutional and normative changes in migration management, from the early post-WWII through the post-Cold War era. Drawing on evidence from multiple sources, including media and elite discourse, policy tracking, party manifesto data and public opinion across Europe and the US, the book exposes the restrictive nature of immigration politics and policies when immigration is framed as a security threat, and considers its implications for civil liberties. Informed by a rich breadth of scholarly sub-disciplines, the findings contribute both empirically and theoretically to the literatures on international migration, security and public opinion.

Nowhere Countries: Exclusion of Non-Citizens from Rights through Extra-Territoriality at Home Pauline Maillet, 2019-12-09 In *Nowhere Countries: Exclusion of Non-Citizens from Rights through Extra-Territoriality at Home*, Pauline Maillet proposes to render visible the mechanisms by which states make their territory disappear to prevent asylum seekers' arrival. Using legal analysis and ethnography, this book traces how several states have created spaces deemed extra-territorial.

Social Movements and the Law Lolita Buckner Inniss, Bridget J. Crawford, 2024 *Black Lives Matter* and *#MeToo* are two of the most prominent twenty-first-century social movements in the United States. On the ground and on social media, more people have taken an active stance in support of either or both movements than almost any others in the country's history. *Social Movements and the Law* brings together the voices of twelve scholars and public intellectuals to explore how *Black Lives Matter* and *#MeToo* unfolded—separately and together—and how they enrich, inform, and complicate each other. Structured in dialogues and punctuated with informative text boxes, illustrations, and discussion questions, this accessible guide to an increasingly influential area of the law centers rich intersectional analysis of both movements and prompts readers to undertake further reflection and conversation. At a time of heightened public attention to the broader scholarly

study of human social behavior and interaction, this book shows rather than tells how people with different perspectives can engage one another with open minds and a generosity of spirit--

Women's Religious Voices Nadja Furlan Stante, Maja Bjelica, Jadranka Rebeka Anic, 2022-02 The volume presents theological and religious research that explores women's voices and experiences in the fields of migration, culture and (eco)peacebuilding with the goal to discuss complex and dynamic questions of women's active participation and engagement in these challenges, mainly from the perspective of Central European authors. The chapters address these matters in order to rethink and search for theological and religious responses to the inequalities, prejudices, and conflicts that arise from these crises and look for new ethical paths to mitigate them through interreligious dialogue and religious (eco)peacebuilding
