Cross-cultural Studies in Curriculum Claudia Eppert, Hongyu Wang, 2008 This volume broadens the horizon of educational research in North America by introducing a comprehensive dialogue between Eastern and Western philosophies and perspectives on the subject of curriculum theory and practice. It is a very timely work in light of the progressively globalized nature of education and educational studies and the increasingly widespread attunement to Eastern educational theories in the West. By introducing Eastern perspectives, this book questions taken-for-granted thinking in Western educational thought about the foundations of teaching and learning, curriculum theory, educational policy, and educational issues such as teaching for social justice, service-learning initiatives, human rights and environmental education, and the teaching of content area subjects. It provides an important opportunity for scholars from different countries and different disciplines to establish a solid yet accessible foundation of East-West inquiry that furthers the scope and depth of curriculum studies and to disseminate the insights from this book in the venues in which they work. Researchers, faculty, and graduate students in the fields of curriculum theory, curriculum and instruction, educational foundations, philosophy of education, international/comparative education, and multicultural educational studies will welcome this book. It is appropriate as a text for upper-level courses in these areas.

Hybrid Systems: Computation and Control Maria D. Di Benedetto, Alberto Sangiovanni-Vincentelli, 2001-03-14 This volume contains the proceedings of the Fourth Workshop on Hybrid - stems: Computation and Control (HSCC 2001) held in Rome, Italy on March 28-30, 2001. The Workshop on Hybrid Systems attracts researchers from industry and academia interested in modeling, analysis, synthesis, and implementation of dynamic and reactive systems involving both discrete (integer, logical, symbolic) and continuous behaviors. It is a forum for the discussion of the latest developments in all aspects of hybrid systems, including formal models and computational representations, algorithms and heuristics, computational tools, and new challenging applications. The Fourth HSCC International Workshop continues the series of workshops held in Grenoble, France (HART'97), Berkeley, California, USA (HSCC'98), Nijmegen, The Netherlands (HSCC'99), and Pittsburgh, Pennsylvania, USA (HSCC 2000). Proceedings of these workshops have been published in the Lecture Notes in Computer Science (LNCS) series by Springer-Verlag. In line with the beautiful work that led to the design of the palace in which the

workshop was held, Palazzo Lancellotti in Rome, resulting from the collaboration of many artists and architects of different backgrounds, the challenge faced by the hybrid system community is to harmonize and extract the best from two main research areas: computer science and control theory.

Massenspektrometrie Jürgen H Gross,2012-10-30 Mit Massenspektrometrie – ein Lehrbuch liegt ein Werk vor, das mit seiner umfassenden, präzisen Darstellung sowie seinen vielen gelungenen Illustrationen und Fotos eine Lücke auf dem deutschsprachigen Markt schließt. Dieses im englischsprachigen Raum bereits gut etablierte Buch führt auf grundlegende Weise an die Massenspektrometrie heran, indem es die Prinzipien, Methoden und Anwendungen logisch aufeinander aufbauend erklärt. Schritt für Schritt lernt der Leser, was diese analytische Methode leisten kann, auf welcher vielfältigen Art Massenspektrometer isolierte Ionen in der Gasphase erzeugen, selektieren und manipulieren können und wie man aus den resultierenden Massenspektren analytische Information gewinnt. Moderne sanfte Ionisationsmethoden wie ESI, APCI oder MALDI, klassische Verfahren wie EI, CI, FAB oder FD, Oberflächentechniken wie DESI oder DART und elementmassenspektrometrische Verfahren werden didaktisch durchdacht behandelt. Studienanfänger werden von dem Werk ebenso profitieren wie Fortgeschrittene und Praktiker. Ergänzend zum Buch betreibt der Autor eine frei zugängliche (englischsprachige) Internetseite mit zahlreichen Übungsaufgaben, Lösungen und Bonus-Material unter <http://www.ms-textbook.com>

Paul and the Ancient Celebrity Circuit James R. Harrison,2019-11-18 In this study, James R. Harrison compares the modern cult of celebrity to the quest for glory in late republican and early imperial society. He shows how Paul's ethic of humility, based upon the crucified Christ, stands out in a world obsessed with mutual comparison, boasting, and self-sufficiency. --
